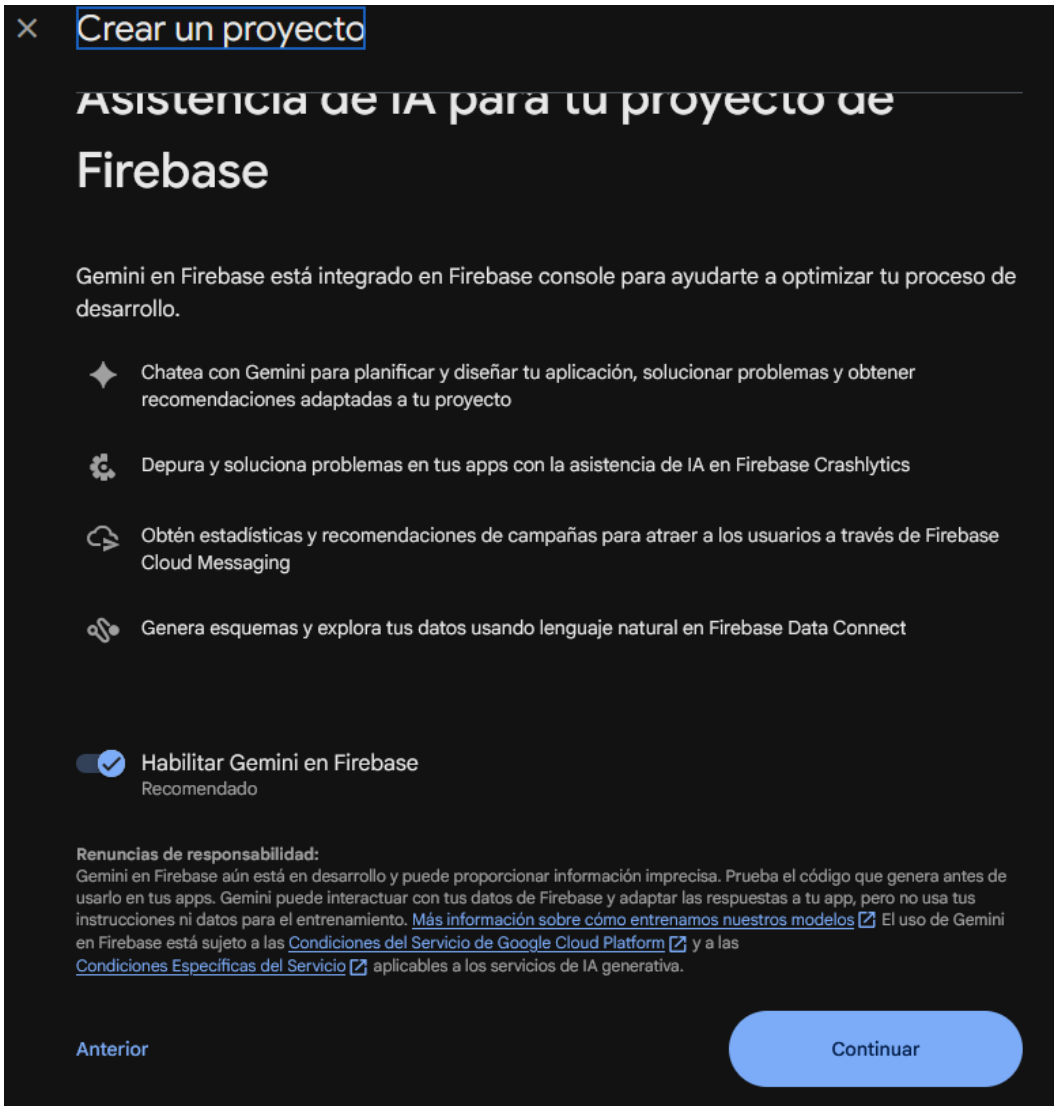
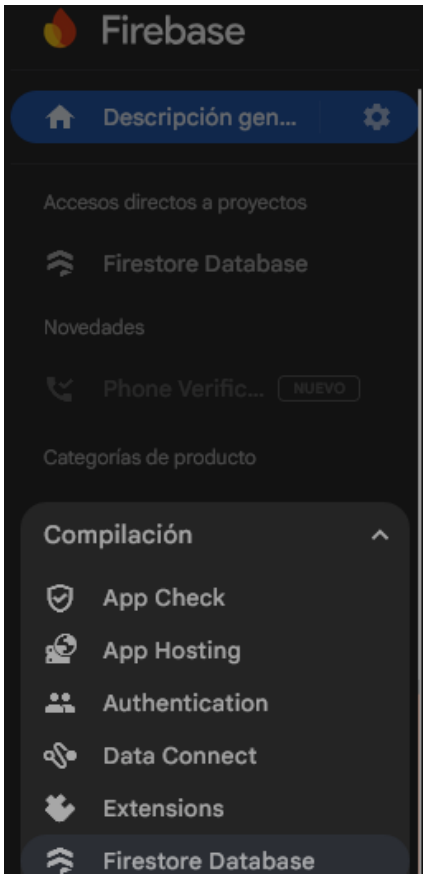
Open Firebase and click Create a project

Config your projetc, in my case accept Gemini and decline Analytics.

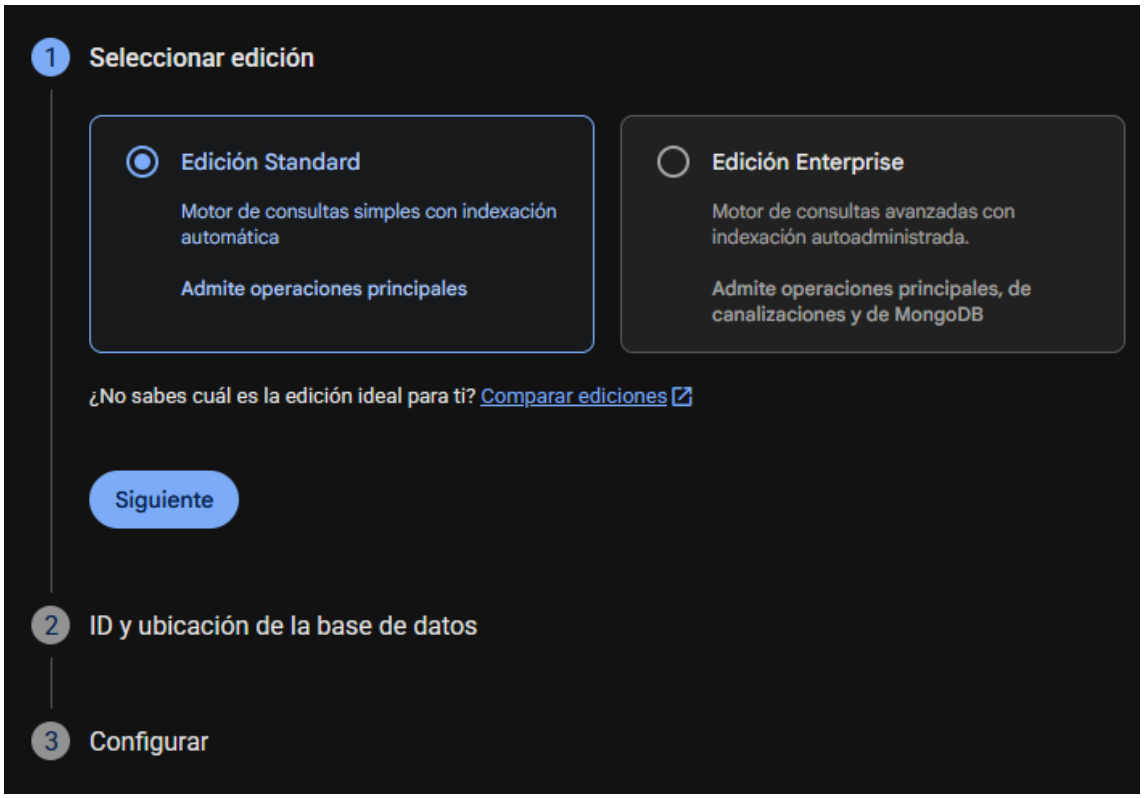


Go to Firebase Database in the lateral menu.

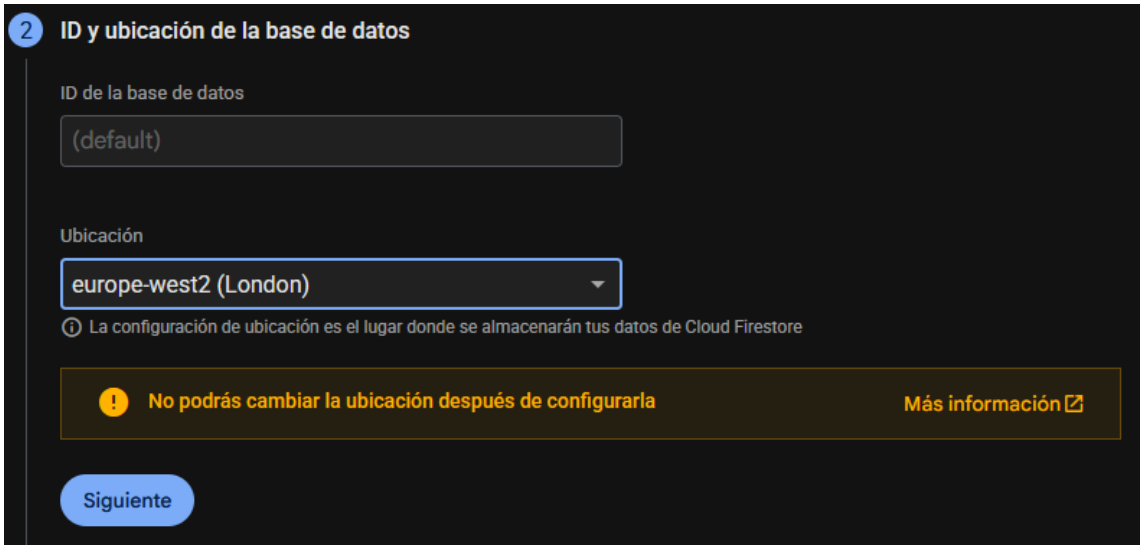


Create database.

Select Standard Edition.

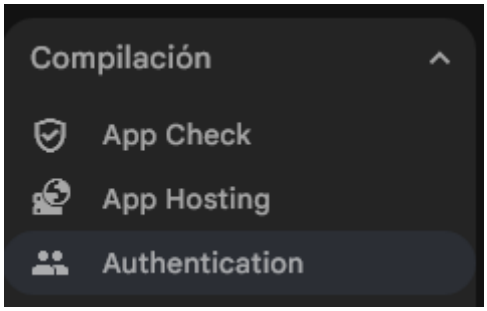


Select your Direction, the most closer than you.

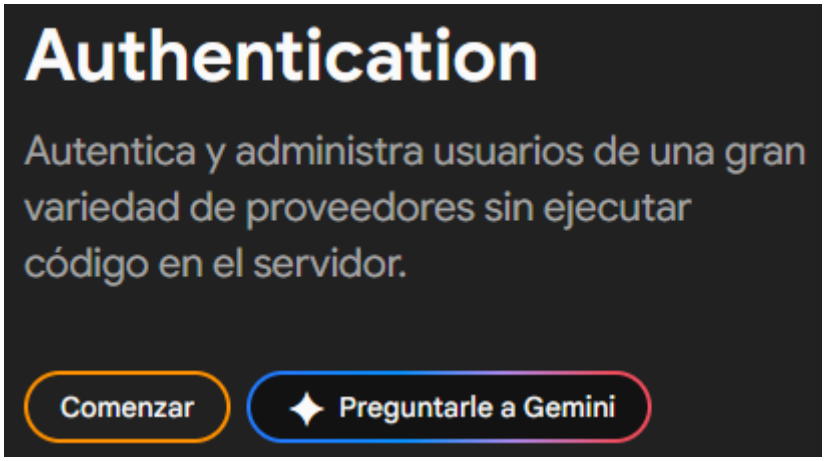


Start Prove mode.

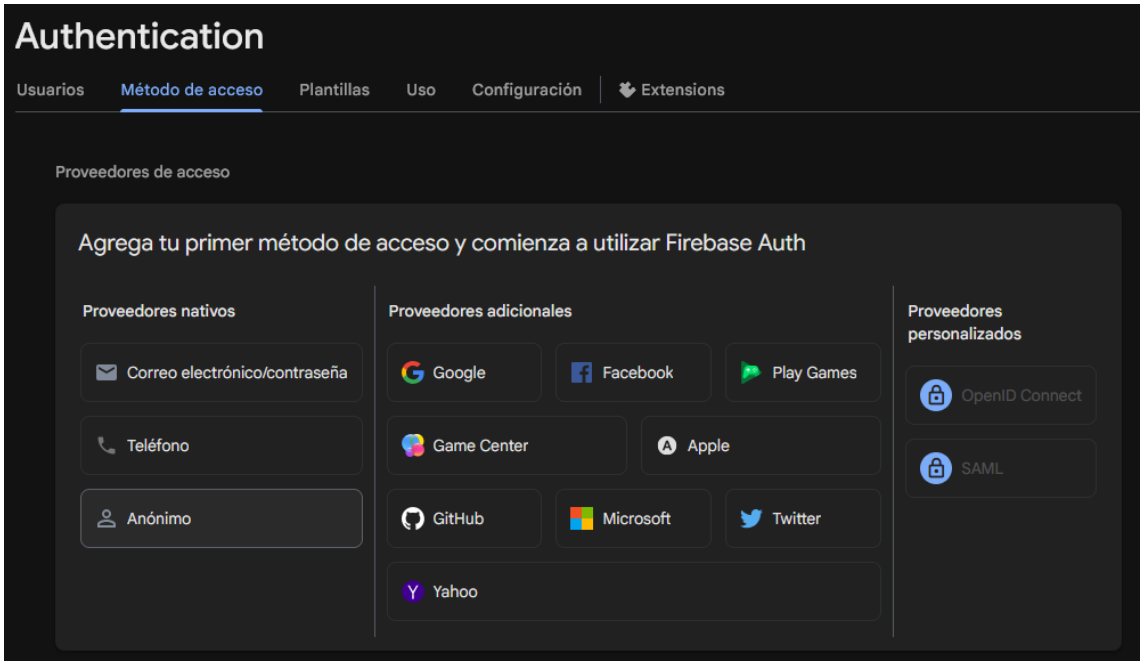
Go to Authentication.



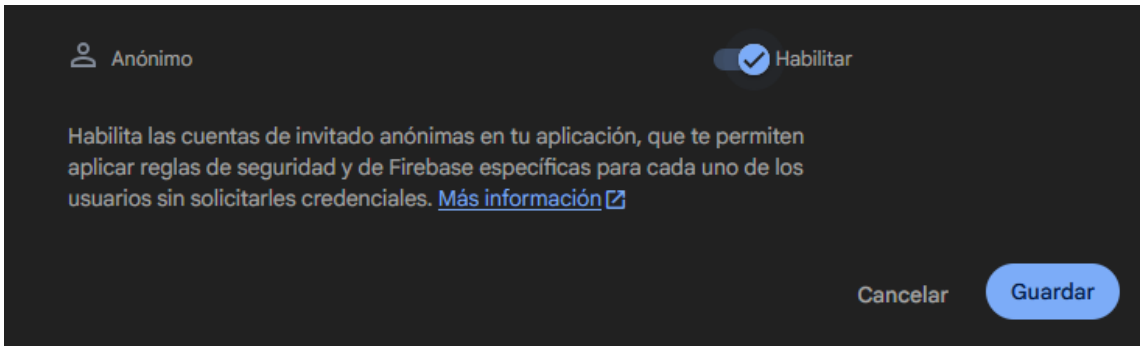
Click Start.



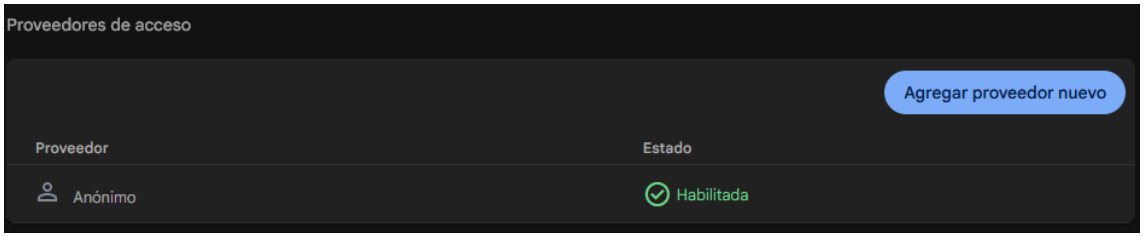
In Access Method upload Anonymous.



Hability Anonymous.



Check it.



Create a Flutter Project.

```
PS F:\DAM2\MOVIL\Actividad5> flutter create mini_kahoot_teacher

  A new version of Flutter is available!

  To update to the latest version, run "flutter upgrade".

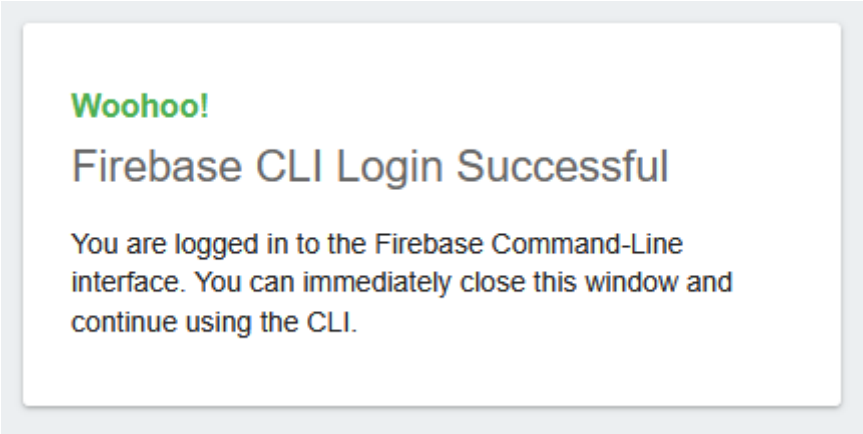
Creating project mini_kahoot_teacher...
```

Install the firebase tolos.

```
PS F:\DAM2\MOVIL\Actividad5> cd mini_kahoot_teacher
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_teacher> npm install -g firebase-tools
```

Login in to your account.

```
  run `npm fund` for details
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_teacher> firebase login
```



```
Waiting for authentication...

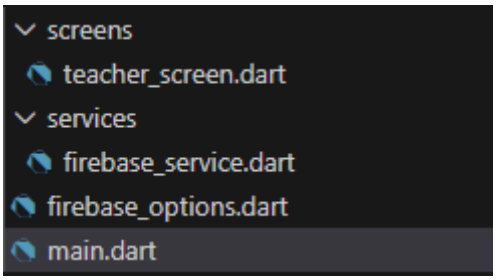
+  Success! Logged in as nachogarciarene@gmail.com
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_teacher> dart pub global activate flutterfire_cli
The Dart CLI developer tool uses Google Analytics to report usage and diagnostic
data along with package dependencies, and crash reporting to send basic crash
```

Select the firebase Project.

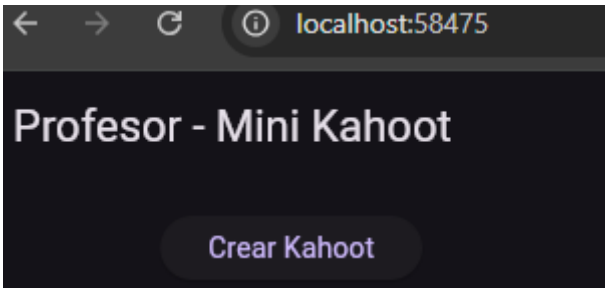
```
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_teacher> dart pub global run flutterfire_cli:flutterfire configure
 i Found 3 Firebase projects.
 ? Select a Firebase project to configure your Flutter application with ›
   applicationname-3d90d (applicationName)
   fireplaypractica (fireplayPractica)
 › mini-kahoot-5974f (mini-kahoot)
   <create a new project>
```

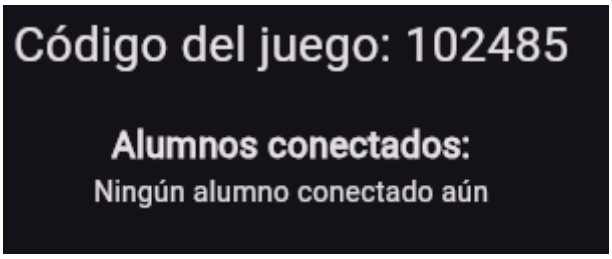
```
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_teacher> flutter pub add firebase_core cloud_firestore firebase_auth
Resolving dependencies...
Downloading packages... (1.1s)
+ _flutterfire_internals 1.3.66
  characters 1.4.0 (1.4.1 available)
+ cloud_firestore 6.1.2
+ cloud_firestore_platform_interface 7.0.6
```

Put the example codes into screens and services.

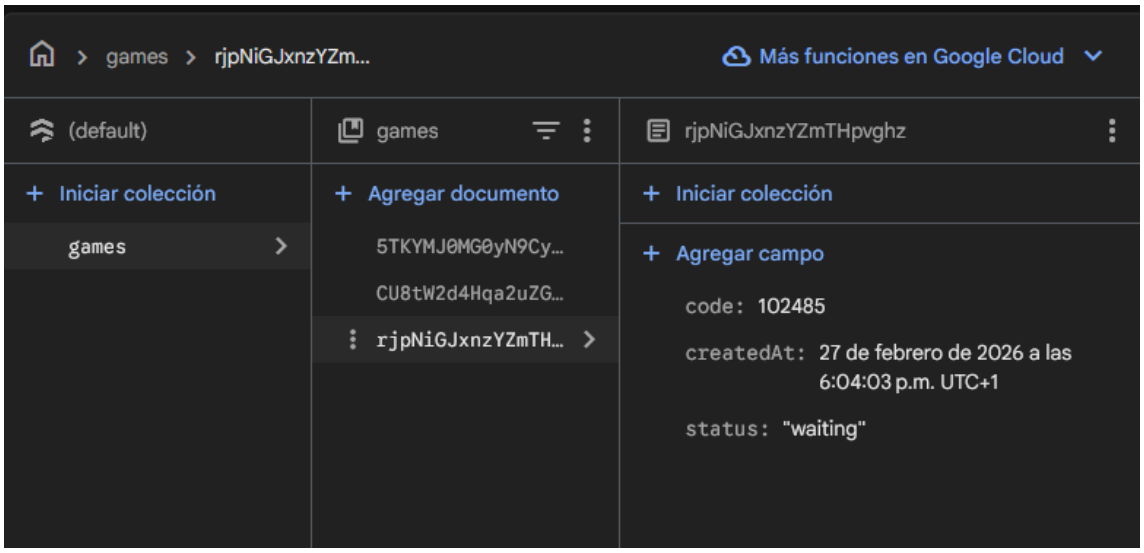


Prove it.





Start teacher Project and you see if the game creates in Firebase Database.



Create the student Project.

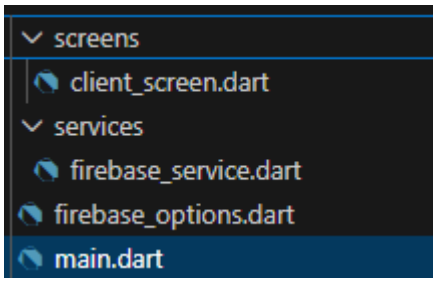
```
PS F:\DAM2\MOVIL\Actividad5> flutter create mini_kahoot_client
Creating project mini_kahoot_client...
Resolving dependencies in `mini_kahoot_client`...
Downloading packages...
Got dependencies in `mini_kahoot_client`.
```

Same configuration and dependencys.

```
PS F:\DAM2\MOVIL\Actividad5> cd mini_kahoot_client
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_client> dart pub global run flutterfire_cli:flutterfire configure
i Found 3 Firebase projects.
? Select a Firebase project to configure your Flutter application with ›
  applicationname-3d90d (applicationName)
  fireplaypractica (fireplayPractica)
❯ mini-kahoot-5974f (mini-kahoot)
  <create a new project>
```

```
PS F:\DAM2\MOVIL\Actividad5\mini_kahoot_client> flutter pub add firebase_core cloud_firestore firebase_auth
```

Put the example codes.



Test It.

Alumno - Mini Kahoot
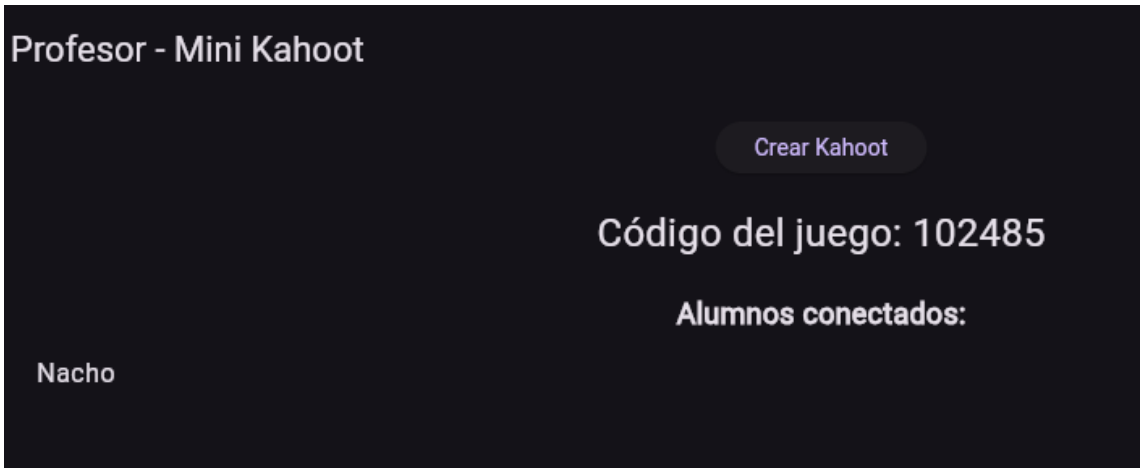
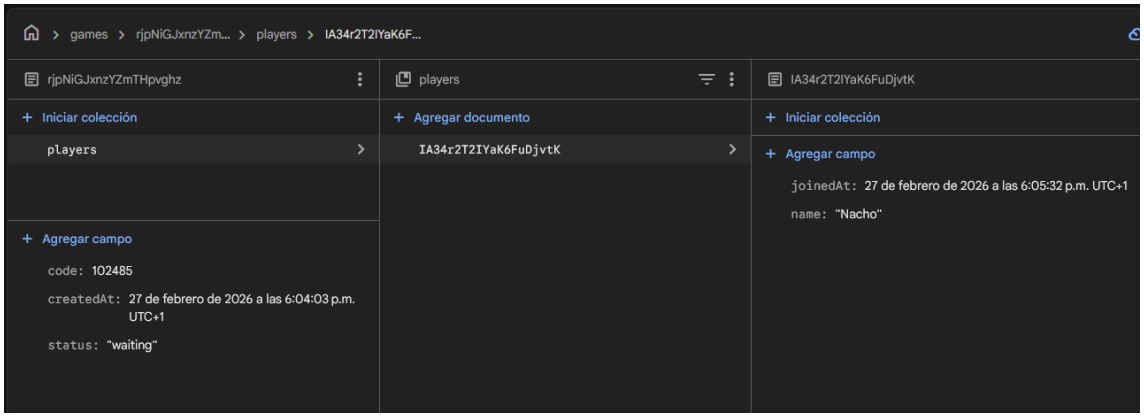
¡Te has unido correctamente!
Esperando a que el profesor empiece...





The student connects to the Teacher game, in the database you can see it too.
